## **Accounting standards are currently failing many businesses, is yours one?**

The HMRC deadline for the submission of annual accounts, statements and tax returns relating to the tax year ending 5<sup>th</sup> April 2010 passed on 31<sup>st</sup> January. How can submitting these reports 10 months later be good for any business, regardless of size? Were you chasing the deadline? You could say that it is reminiscent of

***"Shutting the Stable door long after the Horse has bolted, been ridden by one of your competitors and put out to pasture!"***
